Fyi. Nice job on the Cos and Jen farewell today!

Just a heads up that we're working on this. We'll have something for you soon.

I have also read that Biden is planning on issuing a 30 by 30 executive order. Will be interesting to see if he does and what it says!

Thanks, Anne!

Glad you're aware of this initiative and glad you're interested in being engaged. We'll include you in our upcoming meetings.

Best,  
John

Hi John and Jessica,

Happy New Year, John! I think after we get over these initial rocky bumps, it will be a good one 😊.

I have heard about the 30 by 2030 initiative, I think it's exciting and very cool that it is on the DRA's radar.

Hi John,  
I hadn't heard of this goal, but share in your excitement! We definitely have species and species conservation related info, including current protected areas, habitat connectivity, Candidate Ecological Restoration Areas, climate vulnerable species, and other.

**Importance:** High

Happy new year, Jessica & Anne!

I was copied on a message from our DRA, Diana Esher, who of course will be our acting RA come January 20th. She mentioned a goal of conserving 30% of the land by 2030 to protect species from climate change. There's more information at this link from the NYT. Diana is energized about the prospect of moving on issues like this one as we transition to a new administration. Are you familiar with this goal and the work to achieve it?

<https://www.campaignfornature.org/news/category/30x30>

I'm excited about Diana's interest in this work and eager to learn how we can create some momentum in R3 to help achieve that goal. **Deliberative / Ex. 5 [possible approach to climate change work]** I'm hoping we can caucus to discuss opportunities.

Thanks, and hope you both are having a wonderful holiday.

John
